

Join Us for the Virtual Merritt College Cybersecurity Program Employer Day

Friday, October 9, 2020 | 10:00 – 12:00 (PST)

WHAT IS EMPLOYER DAY

Employer Day is our virtual career fair where hiring managers and recruiters can meet our students. This is an opportunity for participating companies to provide a short company overview and conduct 10 minute one-on-one online interviews with students.

A PROGRAM DESIGNED FOR SUCCESS

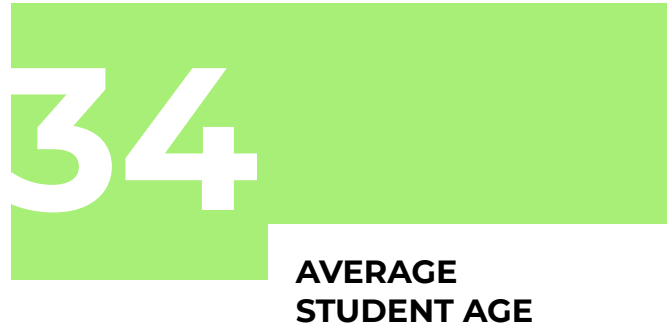

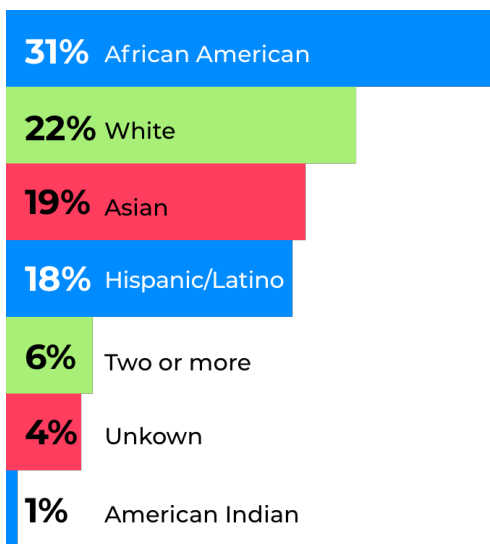

The Merritt College Cybersecurity Program was developed through an on-going partnership with the Consortium of Information Systems Executives (CISE). Industry professionals from more than 30 Bay Area companies collaborated to create a program that would set a new standard. Today, ours is one of the few accredited Cybersecurity Associate Degree Programs in the state of California. Classes are led by professionals actively working in the field, which allows them to provide real-world insights and practical guidance. The curriculum continually evolves to reflect the most current issues in information security.

RECRUIT THE BEST

Our students set the bar. Over the last four years our students have placed in the top five in the Gold and Silver categories at the National Cyber League, beating many 4-year universities and colleges. We believe that diversity makes cybersecurity stronger and more effective. And we're proud that our students come from all different types of backgrounds that reflect our community.

STUDENT ETHNICITY

Our graduates are ready on day one for entry level security analyst positions. Many of our graduates are working for companies ranging from Fortune 500 to startups in life sciences, financial services, insurance, health care, high tech, consulting and energy throughout the Bay Area and beyond.

Programs such as Merritt's allow us to quickly recruit diverse cybersecurity experts and interns who've learned from top industry experts, so we're confident they can hit the ground running."

Robert Tibbs, founder and CEO of ConSol USA

How to Participate

RSVP by Monday, September 24 if you'd like to participate. We encourage both hiring managers and recruiters to attend. Details will be communicated shortly.
